

EXACT SOURCE-DATA REPRODUCTION

Descriptor screen; released prediction metrics and coupling validation
Exact error propagation; measured-set precision and recall arithmetic

ALGORITHMIC REIMPLEMENTATION

Disclosed MLP architecture family; analytical coupling and error APIs
Original trained weights and the training process are not recovered

PARTIAL

Near-exact dipole-to-coupling match; conditional physical convention
34-point screening map; incomplete score-to-identity correspondence

UNAVAILABLE FROM RELEASED EVIDENCE

Original geometry inputs, preprocessing and trained weights
Full trajectories, all 180 system scores and pair-level aggregation

Released evaluation is reproducible; original neural-network training is not.
